

Does your CIA require SCADA? Contact Cachelan

Many CIAs for solar PV systems over 50kW now require an LDC SCADA interface for remote trip and monitoring as a condition of connection. This requires that specialized equipment, built to the [LDC specifications](#), be installed and working before grid connection is allowed. Cachelan can provide a SCADA interface solution to ensure you meet your COD deadline.

LDCs have different requirements

Cachelan has delivered turnkey interface enclosures to work with the SCADA systems of many Ontario LDCs. Send Cachelan your solar PV project SLD and CIA. We will provide a detailed quote, then [build, program and commission](#) the equipment to meet LDC specifications so you receive approval to connect.

Build, Program, Commission --> Connect!
